

## THE NEW MERCEDES-BENZ PUSHCHAIRS FROM HARTAN - DYNAMIC, INNOVATIVE, FUNCTIONAL

The successful cooperation between Mercedes-Benz and the German family-owned company Hartan began three years ago. Hartan, from Franconia, have been producing high-quality pushchairs "Made in Germany" since the 1950s. Just like Mercedes-Benz, Hartan stands for innovation, comfort and safety with that unique sporty character. Hartan's interior designs are made of certified organic cotton which is simply the best for your little one. The aluminium chassis is particularly light and combined with the ergonomic seat unit offers total comfort alongside unique stability and manoeuvrability. Hartan pushchairs

incorporate all the technical experience from four generations of German pushchair development and production. Their new pushchair collection with the models AMG GT, AVANTGARDE and PERFORMANCE demonstrate not only an eye-catching look, developed in close coordination with the Mercedes-Benz design department, but also with superior functionality and excellent workmanship. Like all Hartan products, the Mercedes-Benz pushchairs meet the highest of standards in material selection and manufacturing quality. Additionally they are also subject to certification by TÜV.

AMG chassis with car seat  
(Car seat adaptor available as an accessory).
